PROJECTS

INVENTORY TRACKING APPLICATION [PYTHON, REACT]
(View)
Oct 2022 - Present
- *Developed a food tracking application to organize perishables by expiration date with the goal to help prevent food waste and encourage explorative cooking at home.*
- *Collaborated with other software engineers through design, implementation, PR review processes, and organization of tasks using common Kanban practices in Jira.*
- *Incorporated user interaction via command line for commands such as adding food, creating profiles, creating food storages, etc. to enable easier usability.*
- *Integrated a system to save a state (such as a profile) so users don't lose progress when they rerun the application.*
- *Currently converting to a web application using React.*

DONUT SHOP FOOD ORDERING APPLICATION [REACT, CSS, FIREBASE]
(View)
Apr 2023
- *Built a web application for users to order donuts from a local donut shop.*
- *Designed an interface via a mock up to strategize visual placement of user interactive objects.*
- *Implemented order submission form integrated and configured with Firebase so that menu information and customer order data can be stored.*

EVENT MANAGER WEB APPLICATION [REACT, CSS]
(View)
Mar 2023
- *Built a multi-page web application that allows users to create or log in to an account and interact with a list of events.*
- *Implemented authentication to limit creation, deletion, and editing of events to logged in users.*
- *Utilized routing to provide a connection to navigate between pages.*
